SURE Universal is the world-leading and award-winning Remote App for home entertainment and smart home. SURE can send music, videos and photos to a Smart TV and other smart media devices. Legacy devices are supported using Infra-Red (IR) using a phone with a built-in IR Blaster or a WiFi-to-IR converter (sold separately) . You can also control your smart home devices with the power of your voice using SURE voice control. SURE Universal™ is truly an all-in-one home IoT solution – the soul of IoT.★ SURE Universal™ Makes Your Smart Home Simple★ SURE Universal is easy to use! Within minutes of downloading, you can control your smart TV, media streamer, smart lights, air conditioner and more.★ Voice Control★ Use voice commands inside the app! No need for integration with external voice assistants.★ Media Player★ Conveniently browse and play your music and video by folder. SURE Universal media player supports all Popular Audio/Video formats.★ Stream Photos and Videos from Your Phone to a Smart TV★ Stream audio, video and photos from your phone directly to your Smart devices with the built-in media player using WiFi and DLNA. Your favorite photos and videos look good on your phone, but they will look spectacular on a large, high-resolution TV screen.★ File Copy with Shared Network★ Copy files from shared folders in a local network to your mobile device and from your mobile device to a local network.★ SURE Universal - How it Works★ SURE Universal works best on smartphones equipped with an Infra-Red (IR) blaster. For phones with no IR, you can use a Broadlink WiFi-to-IR converter (to enjoy all of the features. Using WiFi, you can control numerous smart TVs and media streamers, such as Samsung, LG, Android, Roku, Kodi, and Amazon FireTV.★ SURE Customer Support★We are here anytime to answer all customer requests and suggestions. Please write a review on the Google Play Store or email us at support@sureuniversal.com.We maintain a large database of approximately one million IR appliances, however, some devices may be missing. If you can't find your device, please send your device brand and model information to us at support@sureuniversal.com.For more information please visit:👉👉 User Permissions★We have a strict privacy policy (see the web site link below), with no unauthorized access to user data, and no sign-in required to operate the remote control. When installing we ask user permissions for the following:1. Identity - for billing in case you want to subscribe to the ad-free version2. Location - For advertising and future IoT 3. Photos/Media/Files - for streaming media from the phone to a Smart TV4. Microphone - access to the microphone for voice commands5. WiFi - for connecting to a Smart TV6. Device ID & Call Info - for muting a Smart TV when your phone rings (enabled via settings) Android is a great platform allowing OEMs to try out new hardware concepts. Android smartphones nowadays come up with lots of built-in sensors. One such sensor is IR Blaster, enabling users to control the TV. Not just Televisions, but IR Blaster can also contain other home appliances with remote control. So, if you have lost your TV remote control, you can control it easily through your smartphone. However, you need an IR Blaster or TV Remote app to control your television with a smartphone. Fortunately, plenty of TV Remote app is available on the Google Play Store, which can be used to control the TV from a smartphone. List of 10 Best IR Blaster (TV Remote) Apps For Android This article will share some of the best IR Blaster apps for Android that you can use right now. So, let's explore the list of best IR Blaster apps. 1. Universal TV Remote You can control your TV, cable box, and other appliances with Universal TV Remote. The app supports popular TV manufacturers, including Samsung, Sanyo, Toshiba, LG, Panasonic, etc. This is the leading TV remote control app available for Android smartphones. It also has features like voice search, power control, and volume control. 2. Mi Remote Controller The app can control televisions, set-top boxes, air conditioners, bright boxes, projectors, etc. If we talk about the TV brand support, Mi Remote Controller supports brands like Samsung, Sony, Panasonic, Sharp, Haier, Micromax, etc. 3. SURE - Smart Home and TV Universal Remote This one easily connects to wifi and IR. Like all Universal remote apps, SURE - Smart Home and TV Universal Remote can control smart TV, regular TV, media streamer, intelligent lights, Air Conditioners, etc. The app can also stream photos & videos from your phone to smart TV using wifi and DLNA. Some other features include voice command support and the ability to copy files from shared folders in a local network to mobile or vice versa. 4. Galaxy Universal Remote The app uses your phone's built-in IR transmitter. With Galaxy Universal Remote, you can control Televisions, Set-top boxes, Streamers, Sound systems, Amplifier, Air Conditioner, Projector, etc. Not only that, but the Galaxy Universal Remote also allows users to create personalized remotes to control all devices from a single screen. 5. Castreal Remote Control This is another best Android app on the list that turns your smartphone into a universal remote control. With this app, you can easily control your Television, media player, air conditioner, projector, home control, cameras, karaoke, etc. To control electronic devices, the app uses your phone's IR Blaster. 6. ASmart Remote IR If you are searching for an intelligent IR Universal Remote control app for your Android smartphone, you need to try a smart Remote IR. Like all other TV remote apps, ASmart Remote IR can be used to control TV, Air Conditioner, DSLR, Media Player, Projectors, etc. In addition, the app supports almost all popular brands and models. 7. BroadLink If you are looking for the best companion to control your IR appliances, then look no other than BroadLink. It's a powerful IR remote control app that allows you to control a wide range of electronic appliances. With BroadLink, you can easily control TV, Air Conditioner, Set-top box, media box, DVD Player, Water heater, Air Purifier, and more. 8. UniMote UniMote is an Android app that uses your phone's IR Blaster to control a wide range of electronic appliances. Once installed, UniMote turns your device into a universal remote to control Smart TV. Some of the key features of UniMote include screen mirroring, screencasting, and more. Overall, UniMote is an excellent TV Remote app for Android. 9. Smart TV Remote Control Smart TV Remote Control from codematics is yet another best IR Blaster app for Android available on the Google Play Store. With Smart TV Remote Control, you can fully control your smart TV. Also, the app can be used to cast the media files like videos, pictures, etc., stored on your mobile phone to a Smart TV Screen. 10. Smart Remote Control Smart Remote Control from Quantic app is a top-rated IR blaster app for Samsung Televisions. The Android app can control almost all popular Samsung Smart TVs. You can use this app to change TV Channels, increase or decrease the volume, mute the sound, add widgets to the home screen, and more. So, these are the best TV remote apps you can use on your Android smartphone. If you know of other such apps, let us know in the comment box below. I hope this article helped you! Please share it with your friends also. Looking for the best IR universal remote apps for Android but don't know which one you should go for? With an IR universal remote app, you can control everything from controlling your TV to your projector. The possibilities are endless, and your Android phone's IR transmitter can do the job for you. However, not all IR remote apps are good, and you might want to save time choosing the right one for you. Also Read: How to Mirror Android Screen to TV Wirelessly or with Cable Why pay when you can get it for free? Here are nine of the coolest apps for you to try out. 1. SURE Universal SURE Universal has provided software that can help you embrace IoT which can be fully integrated into your home. You can download the universal remote control app on your Android device. It gives you the power to control any appliance in your home. The SURE Universal remote can support any protocol in common use due to the combination with the standard OCF. Therefore it can connect with various smart home technologies such as RF like Z-wave and ZigBee. Moreover, it can also connect on network technologies such as Bluetooth and WiFi. The best thing about this Android remote control app is that it allows you to send all your photos from your Android device to the TV. You can move the photos manually and even create a presentation. All this power is in your hand, and you can integrate Amazon Alexa Voice to do all these. SURE Universal lets you control more than a million electronic appliances. However, you need an Android device with an infrared blaster. But for phones with no IR such as Samsung Galaxy S7, S8, S9 and Note 5 you can use a Broadlink WiFi-IR blaster. 2. Anymote - Smart IR Remote Smart IR Remote is a universal remote that can simulate any device which sends signals through infrared. The universal remote is the only one which you can customize to fit into a smart remote. Thus it becomes versatile. You can: Rearrange the buttons. Change the colors, positions, texts, and icons. Execute commands with a single touch. Integrate voice commands using Google Now. Float remotes while you are using other apps. Touch gestures for eyes-free control. Remote control for a TV. However, the Smart IR Remote only works for devices which have an IR-enabled phone. But if your device can work over WiFi, then you can use the universal remote. 3. Google Home There are two varieties of Google Home. There is the Oracle that lets you know your programme for the day. And if you so desire, you can fill your room with white noises. On the other hand, there is another type of Google Home which is more than your answer box. It is an app which sets up, manages and controls your Google Home, Chromecast devices and customizes what you will get from the Google Assistant. Here is a rundown of the key features which Google Home app handles. One touch gives you the control of your home. Thus you can control your Google Home and Chrome cast devices plus connected devices such as the TV and the lights. Control all the devices in your home with just one touch. The Discover tab gives you the chance to discover new features and updates on your compatible devices. For instance, you can find new content from popular streaming sites such as Netflix and YouTube. 4. Unified Remote Unified Remote is the device which you need if you are an individual who uses the desk computer a lot. You can control your PC from your smartphone as long as they are connected to the same WiFi network. However, you will need to install the mobile app on your smartphone and the desktop application on your PC where a quick scan from your mobile app will be able to give you the control you need. Unified Remote has a collection of different commands. Some include: Turning your phone screen to a touchpad that works like a mouse on your PC. It mirrors your PC screen on your mobile device. Powers your PC using WOL. The keyboard can support all types of keyboards such as standard, 3rd party and customized. Manage files. Control media. 5. Twinone TV Remote Twinone is a free universal TV remote app. It has a friendly interface for your smartphone. The app is easy to use. All you need is to open it and choose the device you want to control either your TV, cable box, satellite or any other appliance. However, for the devices which don't fit the categories, there is support for some of them. However the remote only works with mobile devices with IR blasters. The app has a couple of built-in codes that might be useful. The bad part is the advertising. Twinone is not providing an effective way to get rid of them. A paid feature can really come in handy to accommodate the ads. 6. Roku If you are a Roku owner, then the Roku app is an excellent universal remote control app for you. It is a free application which you can download either on the Google Play Store or the Apple Store. The mobile app becomes your companion either on Roku TV or for Roku streaming players. The Roku app requires you to connect to the same network as your Roku platform. However, there are some features which might require you to log into your Roku account, so this should not worry you. The remote control app lets you control pretty much anything on Roku. The remote comes with fast forward, rewind, play, play, navigation and voice search buttons. The only thing it does not have are the volume buttons thus you will need your actual TV remote. The app is fully fledged thus it can allow you to: Search for all your streaming channels at once. Instant replay to hear that dialogue again. Get notified about new episodes instantly Add hidden channels Cast devices from streaming sites to your TV. 7. Yatse Yatse remote is the most popular XBMC/Kodi app. It can be downloaded for free on Android, iOS and Amazon app store. Once you install it on your phone, it easily configures with your device. This universal remote control app has a load of features. They include: Yates's widgets come in different sizes and can give you various functions. They will range from notifications to all the remote capabilities. Yatse offers natural voice commands in seven different languages. Yatse synchronizes your media library over different installations. You can access your library offline. Themes that you can use to skin your Yatse app. 8. IR Universal TV Remote The IR Universal TV Remote is the perfect remote you have been looking for your physical TV. For instance, if you are watching a TV with an antenna, it will point the best direction for your DTV antenna. The IR universal remote control app does not only control your physical TV but also the Air Conditioner, Fans and Lights. However, for the application to function, it will need a smartphone device which has an IR blaster. The IR Universal TV Remote is loaded with features. Some of them include: You can customize the remote. You can edit almost every aspect of the remote depending on your preference. You can easily use the two widgets to control devices from your home screen. Set up macros so that you can control multiple devices with a single touch. The IR Universal Smart Hub will allow you to control multiple devices from different rooms. Moreover, you can also read infrared codes from other remotes. 9. Peel Universal Remote Peel Universal Remote app was one of the most popular apps when devices used to have infrared for like two minutes. Once it collaborated with devices such as Samsung, it gained more than 70 million downloads. The Android remote control app lets you turn your smartphone into a remote where you can control appliances such as the TV, Air Conditioner, Set up boxes and devices like Roku. However, the app only works with smartphones which use an inbuilt IR-blaster. Some of its features include: Rich interface. Comprehensive TV guide. Customizable remote. YouTube live. Voice Control. 10. RCA Universal Remote RCA universal remote is undoubtedly an incredible choice for the users which they can use to control and manage multiple devices instead of only one device. RCA Universal Remote is a relevant option for the users, which is compatible with many devices like CD, DVD player, Blu-ray player and many other streaming devices for the users. RCA Universal Remote can be downloaded on your Android device to control all these devices directly from one place. The overall setup of the RCA Universal Remote is a bit hard because it takes a lot of algorithms and functions to work behind the curtains to manage or control multiple devices. There is a separate list of the tools which are compatible with RCA Universal Remote which can be found on its official website. RCA Universal remote does require a lot of permissions from the Android administrator to work smoothly. This application from the Google Play Store can be downloaded exclusively for free. Once after installing RCA Universal Remote on your Android device, you have to set up the necessary settings on this app to control the other instruments. The easy to use Graphic user-interface of this Android application is also a nice feature of it. The developers of this Universal Remote tool make regular optimizations in this app, which makes it an ideal choice for the users. It is always proffered to install RCA Universal remote because it offers all the incredible features to its users. You may also take the help of a user manual guide on this application to understand the functions of this Universal remote well. 11. The Xbox The Xbox app is another awe-inspiring choice for users who can manage or control multiple devices at once. Xbox app is having one of the cleanest and purest kinds of Graphic user-interface, which is an impressive feature for the users. Users can have quick access to several control buttons like Play or Pause, Rewind or Forward, Volume Up and Volume down, etc. These all are basic controls that every user wants to have in any universal remote. The customized settings on this excellent application will allow you to set up the controls button on this universal remote on your terms and conditions. More controls can also be set up on this application to make things easier and relevant. Once you install this brilliant Universal Remote control, you will become able to access many parts of Xbox live. Any users can get this Universal remote application in his/her Android device by downloading it from Google Play Store. There are millions of reviews and ratings provided by the users to The Xbox application. The overall setup is also very easy to set up which makes it an impressive choice for all users. And as we already mentioned, the graphic user-interface of this app is really very well developed with a lot of attractive features and functions in it. This highly rated Universal remote is having almost every navigation button to make it easier for the users to control the connected devices easily and conveniently. The compatibility of this universal remote will never going to be an issue for the users because it supports more than 1000 devices of several different sections. Users will have to enable the Wi-Fi or Bluetooth support from the settings of this application to get started controlling devices. 12. OEM Specific remote apps While most of the popular smartphones which are manufactured recently come with an in-built universal remote application. For example, most of the smartphones which are made by Xiaomi comes with pre-installed Universal remote, which can control multiple devices. That's why there is no need to install a third-party application to control other devices using these applications. Whereas the OEM specific remote apps are a professional kind of Universal remote apps which is having most of the optimized features in it. Basically, OEM which is "Original Equipment Manufacturer" develops those Universal remote applications which can be compatible with thousands of different phones. Moreover, most of the smartphones comes pre-installed with these applications so that you won't have to buy them. If you are looking for the best free universal remote apps for Android, try these out today. We are sure you won't be disappointed. You may also like: Best Data Recovery App for Android
